Chapter 6 Remote Sensing Applications in Marine Aquaculture

Chapter 6: Selecting Optimally Sustainable Sites 165 Since the late 1980s there has been an increased use of GIS in aquaculture site selection and suitability studies over a variety of spatial scales for both inland pond-based aquaculture (e.g. Meaden, 1987; Meaden and Kapetsky, 1991; Kapetsky, 1994;

Chapter 6 An Integrated GIS Approach for Sustainable ...

A number of factors must be considered when selecting a site. These factors should be included in a comprehensive site analysis. Kővári (1984) groups site selection factors into three broad categories: (1) ecological; (2) biological; and (3) economic and social. These and a fourth category, legal matters, are discussed in this chapter.

Site Selection for Aquaculture | SpringerLink
