Climate Around the World | KS1 - Y1 & Y2 | Geography ...

A region is an area of land that has common features. A region can be defined by natural or

Get Free 12 Sswg0102d

artificial features.

Language, government, or religion can define a region, as can forests, wildlife, or climate.

Regions, large or small, are the basic units of geography. The Middle East is considered a political, environmental, and religious region that includes parts of Africa, Asia, and Europe.

12. Highland climates

Highland climates occur in mountainous regions.

A highland climate zone is composed of several areas whose climates are like those found in flat terrain. Because air temperature decreases with increasing elevation in the mountains, each climate area is restricted
