Critical introductions to a range of literary topics and genres. This book invites readers to reflect on the whole phenomenon of the Victorian novel and its role in dissecting and informing the society which produced it. The reasons for the growth of the novel and its spectacular success is also examined and discussed. Texts and extracts from a selection of Victorian novels and essays, including some material that readers will be unfamiliar with, help to provide a broader understanding of the range of Victorian fiction. Authors include: Thomas Carlyle, Charles Dickens, George Eliot, Anthony Trollope and Max Beerbohm.

This guide steers students through significant critical responses to the Victorian novel from the end of the nineteenth century to the present day.

Guiding students through immediate contexts, key texts, and wider contexts of the Victorian novel, this book explores all the major writers and their subsequent afterlives.

Taking as his point of departure the competing uses of the critical term the materiality of writing, Daniel Hack turns to the past in this provocative new book to recover the ways in which the multiple aspects of writing now conjured by that term were represented and related to one another in the mid-nineteenth century. Diverging from much contemporary criticism, he argues that attention to the writing ’ s material components and contexts does not by itself constitute reading against the grain. On the contrary, the Victorian discourse on authorship and the novels Hack discusses—including works by Thackeray, Dickens, Collins, and Eliot—actively investigate the significance and mutual relevance of the written word or printed word ’ s physicality, the exchange of texts for money, the workings of signification, and the corporeality of writers, readers, and characters. Hack shows how these investigations, which involve positioning the novel in relation to such widely denigrated forms of writing as the advertisement and the begging letter, bring into play such basic novelistic properties as sympathetic identification, narrative authority, and fictionality itself. Combining formalist and historicist critical methods in innovative fashion, Hack changes the way we think about the Victorian novel's simultaneous status as text, book, and commodity.

How to Read the Victorian Novel provides a unique introduction to the genre. Using examples from the classics, like *The Pickwick Papers*, *David Copperfield*, *Jane Eyre*, *The Woman in White*, and *Middlemarch*, it demonstrates just how unfamiliar their familiarity is. The book attempts to break free of the sense that the Victorian novel is somehow old fashioned, moralizing, and formally careless by emphasizing the complexity, difficulty, and rare pleasures of the Victorian writers ’ strenuous efforts both to entertain and to teach; to create serious “ art ” and to appeal to wide audiences; to respond both to the demands of publishing and also to their own rich imaginative engagement with a world heading into modernity at full speed. Broad in its scope, the text surveys a wide variety of literary types and explores the cultural and historical developments of the novel form itself. The book also poses a series of “ big questions ” pertaining to money, capitalism, industry, race, gender, and, at the same time, to formal issues, such as plotting, perspective, and realist representation. In addition, it locates the qualities that give to the great variety of Victorian novels a “ family resemblance, ” the material conditions of their production, their tendency to multiply plots, their obsession with class and money, their problematic handling of gender questions, and their commitment to realist representation. *How to Read the Victorian Novel* challenges our comfortable expectations of the genre in order to explore intensively a burgeoning and changing literary form which mirrors a burgeoning and changing society.

This guide steers students through significant critical responses to the Victorian novel from the end of the nineteenth century to the present day.

How to Do Things with Books in Victorian Britain asks how our culture came to frown on using books for any purpose other than reading. When did the coffee-table book become an object of scorn? Why did law courts forbid witnesses to kiss the Bible? What made Victorian cartoonists mock commuters who hid behind the newspaper, ladies who matched their books' binding to their dress, and servants who reduced newspapers to fish 'n' chips wrap? Shedding new light on novels by Thackeray, Dickens, the Brontës, Trollope, and Collins, as well as the urban sociology of Henry Mayhew, Leah Price also uncovers the lives and afterlives of anonymous religious tracts and household manuals. From knickknacks to wastepaper, books mattered to the Victorians in ways that cannot be explained by their printed content alone. And whether displayed, defaced, exchanged, or discarded, printed matter participated, and still participates, in a range of transactions that stretches far beyond reading. Supplementing close readings with a sensitive reconstruction of how Victorians thought and felt about books, Price offers a new model for integrating literary theory with cultural history. How to Do Things with Books in Victorian Britain reshapes our understanding of the interplay between words and objects in the nineteenth century and beyond.
