"Professor Perkins' Agricultural Development in China, 1368-1968, is one of the most important books yet to be published on modern China. It is an original, highly professional, economic analysis of a subject which had been virtually unexplored, and has opened up a new field of research for scholars of China."

The development of farming over the course of China's history has played a key role in supporting the growth of what is now the largest population in the world. Analysis of stone tools by Professor Liu Li and others has shown that hunter-gatherers 23,000-19,500 years ago ground wild plants with the same tools that would later be used for millet and rice.

**Agriculture in China - Wikipedia**

The Sung and Yuan Dynasties (960-1368) with their firm local government administrations were notable in organizing and promoting agricultural research, extension work, and the teaching of agriculture and sericulture, much facilitated by the invention of woodblock printing, which allowed agricultural treatises and practical handbooks to be widely distributed.
