W. E. B. Du Bois was a public intellectual, sociologist, and activist on behalf of the African American community. He profoundly shaped black political culture in the United States

they all share the lyrical intelligence and musical gift that has made Paterson one of our most celebrated poets. Addressed to friends and enemies, the living and the dead, children, musicians, poets, and dogs, these poems are as ambitious in their scope and tonal range

voices call home from

These are voices
frustrated by distance

themes—contradiction
and strangeness,
tension and
transformation, the
dream world, and the

What would happen if someone invented a machine that could

Use our guide to create an exact duplicate of anything? That is the simple but remarkable premise of Damon Knight's classic 1959 novel, *A for Anything*. "The Gismo," as the machine is known, seems like it will end poverty and need forever. But of course, things are not that

Simple. Like any truly great work of science fiction, Knight's novel boldly pursues the ramifications of his premise. What will people do if there is no longer any need to work for anything? What happens if this device is spread carelessly throughout the world (it can even duplicate itself!).

When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland , California. That's
