Nowhere is this more apparent than Japan, a nation with an architectural tradition like no other. Long before screws and metal fastenings became de rigueur, Japanese builders had mastered the art of wood joinery. Using techniques handed down in guilds and families for centuries, Japanese builders would fit wooden beams together without any external fasteners.

Kintsugi (金継ぎ, "golden joinery"), also known as kintsukuroi (金繕い, "golden repair"), is the Japanese art of repairing broken pottery by mending the areas of breakage with lacquer dusted or mixed with powdered gold, silver, or platinum, a method similar to the maki-e technique.

Kintsugi - Wikipedia

Used to construct everything from temples to cabinetry, Japanese wood joinery involves the elaborate process of slotting pieces of lumber or timber together to produce interlocking Japanese wood joints. Materials such as glue, stitching, or nails are not required in this process.
