We are in the midst of what may well be the most confusing, turbulent period in the history of modern medicine. This book seeks to cut through the fog and confusion that enshrouds the health care industry to provide clarity on where the industry stands today and where it is headed. The book defines the major challenges in health care through the journey of Northwell Health, one of the largest provider organizations in the country. The central issues in what is nearly one-fifth of the United States economy are played out daily within this not-for-profit organization. Northwell is New York state's largest workers, and \$11 billion in annual revenue. The book candidly portrays key leaders within Northwell on the most vexing challenges in health care: How to provide primary and specialty care spending; how to create and sustain an internal system of continuous learning to enable employees at all levels to stay current in an industry that is changing at warp speed; how to provide emergency services in a world where natural disasters and acts of terrorism are inevitable; how to identify new revenue streams to offset reductions from Medicare and Medicaid; and how to push outside the walls of hospitals and clinics to improve the overall health of individuals and communities by working on determinants of health beyond the typical medical practice. The book exists at the intersection of medicine, business, social and public policy. Harvard's Michael Porter has written widely on health care arguing that it is time "for a fundamentally new strategy," but what, exactly? Where is the industry headed? What do the changes and the turbulence mean for patients, doctors, nurses? This book is the product of a learning journey both humbling and rewarding. Over time, lessons learned, improvements made, innovations conceived, have advanced Northwell Health in ways that, some years ago, might not have seemed possible. Northwell has become a national leader not because it is perfect, but because it remains steadfast in its journey to remain humble enough to know that whatever success may be achieved, the journey is about continuous learning and improvement. The goal of the book is to provide a deeper, clearer understanding of what is happening in health care and why; to help illuminate a pathway forward for patients and caregivers most of all, but also for policy-makers and the employers and others who pay for care.

It was a dark and stormy night in Santa Barbara. January 19, 2017. The next day's inauguration drumroll played on the evening news. Huddled around a table were nine Corwin authors and their publisher, who together have devoted their careers to equity in education. They couldn't change the weather, they couldn't heal a fractured country, but they did have the power to put their collective wisdom about EL education upon the page to ensure our multilingual learners reach their highest potential. Proudly, we introduce you now to the fruit of that effort: Breaking Down the Wall: Essential Shifts for English Learners' Success. In this first-of-a-kind collaboration, teachers and leaders, whether in small towns or large urban centers, finally have both the research and the practical strategies to take those first steps toward excellence in educating our culturally and linguistically diverse children. It's a book to be celebrated because it means we can throw away the dark glasses of deficit-based approaches and see children who come to school speaking a different home language for what they really are: learners with tremendous assets. The authors' contributions are arranged in nine chapters that become nine tenets for teachers and administrators to use as calls to actions in their own efforts to realize our English learners' potential: 1. From Deficit-Based to Asset-Based 2. From Compliance to Excellence 3. From Watering Down to Challenging 4. From Isolation to Collaboration 5. From Silence to Conversation 6. From Language to Language, Literacy, and Content 7. From Assessment of Learning to Assessment for and as Learning 8. From Monolingualism to Multilingualism 9. From Nobody Cares to Everyone/Every Community Cares Read this book; the chapters speak to one another, a melodic echo of expertise, classroom vignettes, and steps to take. To shift the status quo is neither fast nor easy, but there is a clear process, and it's laid out here in Breaking Down the Wall. To distill it into a single line would go something like this: if we can assume mutual ownership, if we can connect instruction to all children's personal, social, cultural, and linguistic identities, then all students will achieve.

In the ever-changing world of business, we've arrived at a point where process has trumped culture, where the race toward efficiency has left us unable to reach our potential. Stuck in the land of status quo, we've forgotten how to think. The very structures put in place to help businesses grow are now holding us back;; it's time to Kill the Company. This book is a call to arms: to start a revolution in how we think and work. But instead of more one-size-fits-all change initiatives forced upon employees, we need to embrace small changes that create ripple effects throughout the organization. Lisa Bodell urges companies to move from "Zombies, Inc." to "Think, Inc." Thinking can no longer be exclusive to the creative team or lead strategists. A culture of curiosity must be fostered among the ranks to shake up our standard practices, from unproductive meetings to go-nowhere strategic planning. This revolution can and will awaken our ability to think, and ultimately, to innovate and grow.
