The guinea pigs of Dandeville love munching dandelion leaves so much that dandelions are disappearing from all over town. Christopher Nibble knows that crunch time has come when there's just one dandelion left-but will this plucky little guinea pig have the flower power to save the day? An eco-friendly tale to entertain the youngest readers.

We return to Dandeville and catch up with our little eco-guinea pig, Christopher Nibble. This time Christopher is on a mission to reduce waste as he recycles materials in all sorts of creative ways, to the delight of his friends and neighbours.

## Online Library Christopher Nibble

Christopher Nibble is so busy tending his dandelion patch that it's starting to take over his life and he doesn't even have time for football any more. Then he meets his new neighbour, Posie. She offers to help him out in the garden. When the dandelion seedlings start being nibbled by caterpillars, it's Posie's idea to keep them as pets. Mr Rosetti from the café gives them some empty sweet jars and Christopher and Posie feed their furry caterpillars and watch them grow. But one morning Christopher and Posie can't see any caterpillars in their jars. They have disappeared! Quite desperate, they make 'missing' posters and put them up all over Dandeville. It takes Mr Rosetti to reveal the miracle of metamorphosis to the two bereft guinea pigs. After the mystery is solved, Christopher and Posie's lost-and-found posters showing brightly coloured caterpillars and butterflies delight all the guinea pigs of Dandeville when they are displayed in a special exhibition at the art gallery.

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the

design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

In this sequel to *Nibbles*, the adorable guinea pig and his new friend raise caterpillars

Miracles tells the haunting and beautiful story of Julia and her family as they struggle to live in a time of extraordinary change. On an ordinary Saturday in a California suburb, Julia awakes to discover that something has happened to the rotation of the earth. The days and nights are growing longer and longer; gravity is affected; the birds, the tides, human behavior, and cosmic rhythms are thrown into disarray. In a world that seems filled with danger and loss, Julia also must face surprising developments in herself, and in her personal world—divisions widening between her parents, strange behavior by her friends, the pain and vulnerability of first love, a growing sense of isolation, and a surprising, rebellious new strength. With crystalline prose and the indelible magic of a born storyteller, Karen Thompson Walker gives us a breathtaking portrait of people finding ways to go on in an ever-evolving world. “Gripping drama . . . flawlessly written; it could be the most assured debut by an American writer since Jennifer Egan’s *Emerald City*.”—The Denver Post “Pure magnificence.”—Nathan Englander “Provides solace with its wisdom, compassion, and elegance.”—Curtis Sittenfeld “Riveting, heartbreaking, profoundly moving.”—Kirkus Reviews (starred review) Look for special features inside.
