The Colle System, also known as the Colle/Koltanowski System, is a chess opening strategy for White introduced in the 1920s by the Belgian master Edgard Colle. It was then further developed by George Koltanowski. This variation of the Queen's Pawn Game is characterised by a systematic if modest development of White's minor pieces to support a quick pawn move to the e4-square. The Colle is considered solid, but inflexible.

Introduction—Colle System

Some common "system" openings: Colle (d4, e3, c3, Bd3) Colle-Zukertort (white plays the Colle with b3 and Bb2 instead of c3) Stonewall Attack (d4, e3, f4, Bd3) King's Indian Attack (e4, d3, g3, Bg2, Nf3) Notice that these openings don't try to occupy the center. By not occupying the center, white avoids confrontation until later in the game.

The formation c3-d4-e3 is the famous Colle triangle. Although White takes two moves to achieve e4, it should lead either to an open game after...dxe4 or, if Black avoids the exchange, the strong advance e5. Black should keep up the pressure on d4, holding up White's e4 break and threatening to isolate the d-pawn. Here's a game to get us started:
