middle ear, the cochlea, and the nervous system in a comprehensive manner. It has become apparent that the function of the ear affects the function of the auditory nervous system, and that pathologies of the peripheral parts of the auditory system can affect the function of the nervous system, and vice versa. The classical

The National Research Council convened an expert committee at the request of the SSA to study the issues related to disability determination for people with hearing loss. This volume is

the product of that study. Hearing Loss: Determining Eligibility for Social Security Benefits reviews current knowledge about hearing loss and its measurement and treatment, and provides an evaluation of the strengths and weaknesses of the current processes and criteria. It recommends changes to strengthen the
