Study Guide Key Stars Earth Science - u1.sparkolutions.co A star must be between 10 and 100 times the mass of the sun. A star must be larger than about 1.5 solar masses and less than 5 times the mass of the Sun. The size of the star doesn't matter.

Glencoe Earth Science Chapter 20: Stars - Study.com The celestial objects are the stars. They move in the same direction at the same speed. Apparent Daily Motion. celestial objects appear to follow a circular path at a continuous rate of 15 degrees per hour or one complete circle every day (24 * hr/day x 15 * /hr = 360 * /day), this motion is called Apparent Daily Motion.

Earth Science Study Guide Flashcards | Quizlet Earth Science Study Guide Stars Learn to identify the different sizes and colors of stars and how they relate to the star life cycle. In this lesson, we'll talk about spectral classification, how many stars there are of each type...

Earth Science Study Guide Stars Answer Key Stars are fueled by nuclear fusion in their cores. Most stars spend 90 percent of their lives as main sequence stars, converting H into He. Nuclear fission, on the other hand, is the breaking apart of heavy nuclei such as uranium. You can remember the word fusion because you know that to fuse two objects means to stick them together.
