Our endeavours to make this book for the readers from various educational backgrounds, we have made the contents of this books relevant from the exam point of view and has been updated as per the current exam pattern and this book covers various topics for the exam.

This ism-busting text is an enormously accessible account of the key philosophical and theoretical ideas that have informed geographical research. It makes abstract ideas explicit and clearly connects it with real practices of geographical research and knowledge. Written with flair and passion, A Student's Introduction to Geographical Thought: Explains the key ideas: scientific realism, anti-realism and idealism / positivism / critical rationalism / Marxism and critical realism/ social constructionism and feminism / phenomenology and post-phenomenology / postmodernism and post-structuralism / complexity / moral philosophy. Uses examples that address both physical geography and human geography. Use a familiar and real-world example - 'the beach' - as an entry point to basic questions of philosophy, returning to this to illustrate and to explain the links between philosophy, theory, and methodology. All chapters end with summaries and sources of further reading, a glossary explaining key terms, exercises with commentaries, and web resources of key articles from the journals Progress in Human Geography and Progress in Physical Geography. A Student's Introduction to Geographical Thought is a completely accessible student A-Z of theory and practice for both human and physical geography.

NEW YORK TIMES BESTSELLER • In this provocative, startling book, Robert D. Kaplan, the bestselling author of Monsoon and Balkan Ghosts, offers a revelatory new prism through which to view global upheavals and to understand what lies ahead for continents and countries around the world. Bestselling author Robert D. Kaplan builds on the insights, discoveries, and theories of great geographers and geopolitical thinkers of the recent and distant past to look back at critical pivots in history and then to look forward at the evolving global scene. Kaplan traces the history of the world's hot spots by examining their climates, topographies, and proximities to other embattled lands. He then applies the lessons learned to the present crises in Europe, Russia, China, the Indian Subcontinent, Turkey, Iran, and the Arab Middle East. The result is a holistic interpretation of the next cycle of conflict throughout Eurasia, a visionary glimpse into a future that can be understood only in the context of temperature, land allotment, and other physical certainties. A brilliant rebuttal to thinkers who suggest that globalism will trump geography, this indispensable work shows how timeless truths and natural facts can help prevent this century's looming cataclysms. Praise for The Revenge of Geography "[An] ambitious and challenging new book . . . [The Revenge of Geography] displays a formidable grasp of contemporary world politics and serves as a powerful reminder that it has been the planet's geophysical configurations, as much as the flow of competing religions and ideologies, that have shaped human conflicts, past and present."—Malise Ruthven, The New York Review of Books "Robert D. Kaplan, the world-traveling reporter and intellectual whose fourteen books constitute a bedrock of penetrating exposition and analysis on the post-Cold War world . . . strips away much of the cant that suffuses public discourse these days on global developments and gets to a fundamental reality: that geography remains today, as it has been throughout history, one of the most powerful drivers of world events."—The National Interest "Kaplan plunges into a planetary review that is often thrilling in its sheer scale . . . encyclopedic."—The New Yorker "[The Revenge of Geography] serves the facts straight up. . . . Kaplan's realism and willingness to face hard facts make The Revenge of Geography a valuable antidote to the feel-good manifestoes that often masquerade as strategic thought."—The Daily Beast

This collection of papers from Tourism Geographies emphasizes new and emerging research paradigms in the geographic study of tourism. The papers included in this collection follow one of two threads: explicitly supporting specific research frameworks, or implicitly presenting new and emerging theoretical perspectives through empirical research on the geographical topics. These begin with three overview papers from themes that emerged from recent annual meetings of the Association of American Geographers, including evolutionary economic geography (EEG), political ecology and community resilience. Each of these theoretical and conceptual frameworks is leading to new explorations and insights in a wide variety of geographical and social science research, including tourism studies. These are followed by a series of papers that extend our knowledge and thinking on a range of key geographical topics, including development and underdevelopment (by Saarinen & Rogerson), sustainable tourism planning (by Torres-Delgado & Saarinen), encounters with the natural environment (by Hill), and the geography of place names (by Light), as well as economic geography and new technologies and their applications to spatial behavior research. The papers in this special issue are especially relevant to tourism scholars, and very much represent the types of perspectives that Tourism Geographies seek to promote. This book was published as a special issue of Tourism Geographies.
