Interactions Among Living Things Answer Key

In an ecosystem, living things interact with one another, such as a rabbit eating plants or an owl eating a mouse. Living things can interact with the nonliving things in the environment, such as plants affecting the chemistry of the soil by absorbing nutrients through its roots. Likewise, the nonliving things in an environment can dictate what types of living things can survive there.

How Do Living and Nonliving Things Interact in the ...

Life Science Test: Interactions Among Living Things. Use this multiple-choice and written-response printable science exam in your classroom to your test students' knowledge and understanding of the relationship between plants, animals, and other organisms in an ecosystem. This exam also tests students' skills to interpret a diagram of a food chain.
