to 1700 KHz 75 Meter  
EH Antenna on an  
Emergency Van AM  
Broadcast antenna. 2.  
The Author - Ted Hart  
got his license (W5QJR)  
in 1948 and has been  
continuously active.  
Because of an early  
interest in Ham Radio,  
Ted had a very long and  
enjoyable career as an  
Electronics Engineer  
before retiring in 1996.

## IDEAS ON THE EH ANTENNA

The Hart EH Antenna consists of two (2) elements having a natural capacity between them. (Think of a fat dipole) When a voltage is applied to a capacitor an E field will be developed. Also, the current through the capacitor (called displacement current) will develop an H field at

Antennas act as matching systems between sources of electromagnetic energy and space. The goal in using antennas is to optimize this matching. Here is a list of some of the properties of antennas: 1-Field intensity for various directions (antenna pattern). 2-Total power radiated when the antenna is excited by a
