Linux.com

On Linux or Mac,
open up Terminal as
described above and
type the following: ssh
-l username

www.myserver.com.

The -l stands for “log
in as,” and your user
name goes after it. If
SSH is allowed, then
it will ask for a
password. If not,

The Linux & Characteristics of Linux Command Shell For Beginners

The command shell is an application that reads command lines from the keyboard and passes them to the Linux operating system to be executed. When you login to a remote Linux system, using a tool like ssh, you will

Online Library Introduction To

automatically be connected to a shell. Your computing session is kept separate from other user's computing sessions, because they are "enclosed" in a "shell".
