## PDF Keyword

### Keyword Driven

Framework is a type of Functional Automation Testing Framework

which is also known as Table-Driven testing or Action Word based testing. The basic

working of the Keyword Driven Framework is to divide the Test Case into four different parts.

First is called as Test Step, second is Object

Bookmark File

## **Selenium - Part -1 ...**

A Data Driven framework in Selenium is the technique of separating the “data set” from the actual “test case” (code). This framework completely depends on the input test data. The test data is fed from external sources such as an excel file,.CSV file or any database.
