macOS Sierra For Dummies - PDF eBook Free Download

An AppleScript is a series of commands, using the AppleScript language, that tells the computer (and some applications) what to do. In versions of macOS before Yosemite, you had to explicitly turn on Speech Recognition; in Sierra, if you've enabled Dictation, you can use speech commands to instruct your Mac. To see a list of commands your Mac will understand if you speak them, open the Keyboard System Preferences pane, click the Dictation tab, and enable Enhanced Dictation.
