Known in his day as the man who built the Town Hall, Abel Heywood was a leading Manchester publisher who entertained royalty at his home and twice became Mayor of Manchester. Yet before he found success his life was one of poverty and hardship, marked by a prison term in his pursuit of a free press. A campaigner for votes for all and social reform, Heywood attempted to enter Parliament twice, but his working-class origins and radical ideas proved an insurmountable obstacle. As councillor, alderman and mayor, he worked passionately and tirelessly to build the road, railway and tram systems, develop education, improve the provision of hospitals, museums and libraries, better the living conditions of the poor, and make Manchester a great city. Going beyond the experiences of one man, this book explores the wider political, cultural and class context of the Victorian city. It is an honest tale of rags to riches that will appeal to all who wish to discover more about the dramatic history of industrial Manchester and its people.

This collection of essays contributes to scholarship on the emergence of the working classes, by filtering the formation of working-class identity through the rise of the working-class intellectual, a unique cultural figure at the crossroads of two disparate worlds. The essays cover a range of familiar and unfamiliar figures from the 1730s to the 1850s, shedding light on key moments of working-class self-expression.

A detailed study of working-class writers in the period 1830-70, writers such as Thomas Cooper, Thomas Miller, Charles Mackay, William Thom and William and Mary Howitt, whose work appeared in journals such as Douglas Jerrold's Shilling Magazine and Howitt's Journal, this text examines the struggles of Victorian novelists and poets. It looks at how they found publishers and got into print, their readership and the view of the literary establishment. It includes the role of the Royal Literary Fund; the help, if any, from such established writers as Charles Dickens; and the part played by the Countess of Blessington, the patron of some these writers.

"These are excellent volumes in an outstanding and continuing series, one of the most original and important such projects under way. They set an international standard for the recording and publication of public sculpture."—Judging panel, 2003 William MB Berger Prize for British Art History, on the Public Sculpture of Britain series

The five-volume Oxford History of Dissenting Protestant Traditions series is governed by a motif of migration ("out-of-England"). It first traces organized church traditions that arose in England as Dissenters distanced themselves from a state church defined by diocesan episcopacy, the Book of Common Prayer, the Thirty-Nine Articles, and royal supremacy, but then follows those traditions as they spread beyond England -and also traces newer traditions that emerged downstream in other parts of the world from earlier forms of Dissent. Secondly, it does the same for the doctrines, church practices, stances toward state and society, attitudes toward Scripture, and characteristic patterns of organization that also originated in earlier English Dissent, but that have often defined a trajectory of influence independent ecclesiastical organizations. The Oxford History of Protestant Dissenting Traditions, Volume III considers the Dissenting traditions of the United Kingdom, the British Empire, and the United States in the nineteenth century. It provides an overview of the historiography on Dissent while making the case for seeing Dissenters in different Anglophone connections as interconnected and conscious of their genealogical connections. The nineteenth century saw the creation of a vast Anglo-world which also brought Anglophone Dissent to its apogee. Featuring contributions from a team of leading scholars, the volume illustrates that in most parts of the world the later nineteenth century was marked by a growing enthusiasm for the moral and educational activism of the state which plays against the idea of Dissent as a static, purely negative identity. This collection shows that Dissent was a political and constitutional identity, which was often only strong where a dominant Church of England existed to dissent against.
