"This manual has been designed to introduce trainees to safe surgical techniques and obstetric clinical skills in a structured workshop environment. It is the course manual for the Basic Practical Skills in Obstetrics and Gynaecology course offered under the aegis of the Royal College of Obstetricians and Gynaecologists." "This manual consists of three modules covering basic surgical skills and basic skills in obstetrics. This course and manual will be a valuable early step in building safe and sound surgical and obstetric skills and will provide trainees with a firm foundation for their future careers in obstetrics and gynaecology."--BOOK JACKET.

Mastering practical's: community medicine is designed to help students prepare for practical examinations.

Your Secret Weapon for Mastering the USMLE Step 3 How prepared are you for the new USMLE Step 3? Are you worried about answering questions on basic science concepts? Uncertain about managing the clock in CCS cases? Unprepared to answer questions on general surgery topics? This book is the balm. Created by bestselling author and lecturer Dr. Conrad Fischer and Dr. Niket Sonpal, General Surgery: Correlations & Clinical Scenarios provides an entertaining and comprehensive review of internal medicine topics on the USMLE Step 3. Progressive clinical cases--embedded with meaningful foundational science correlations and CCS exam tips--ensure that you're prepared for the new USMLE Step 3. Features: 100 general surgery cases with Q&A provide practice for the multiple-choice exam component of the USMLE Step 3 Embedded basic science correlations prepare you to answer foundational science questions Integrated CCS navigation tips prepare you to handle Computer-based Case Simulations (CCS cases) High-yield coverage of core surgery topics frequently tested on the USMLE Step 3

Preceded by Foundations of epidemiology / revised by David E. Lilienfeld, Paul D. Stolley. 3rd ed. 1994.

Medical Eligibility Criteria for Contraceptive Use reviews the medical eligibility criteria for use of contraception, offering guidance on the safety and use of different methods for women and men with specific characteristics or known medical conditions. The recommendations are based on systematic reviews of available clinical and epidemiological research. It is a companion guideline to Selected Practice Recommendations for Contraceptive Use. Together, these documents are intended to be used by policy-makers, program managers, and the scientific community to support national programs in the preparation of service delivery guidelines. The fourth edition of this useful resource supersedes previous editions, and has been fully updated and expanded. It includes over 86 new recommendations and 165 updates to recommendations in the previous edition. Guidance for populations with special needs is now provided, and a new annex details evidence on drug interactions from concomitant use of antiretroviral therapies and hormonal contraceptives. To assist users familiar with the third edition, new and updated recommendations are highlighted. Everyone involved in providing family planning services and contraception should have the fourth edition of Medical Eligibility Criteria for Contraceptive Use at hand.

This book includes a set of selected papers from the first "International Conference on Enterprise Information Systems," (ICEIS'99) held in SeÚtbal, Portugal, from 27 to 30 March 1999. ICEIS focuses on real world applications and aims at becoming a major point of contact between research scientists, engineers and practitioners in the area of business applications of information systems. This year four simultaneous tracks were held, covering different aspects related to enterprise computing, including: Systems Analysis and Specijication, Database Technology and its Applications, Artificial Intelligence and Decision Support Systems, and Internet and Intranet Computing. Although ICEIS'99 received more than 200 submissions, only 96 papers were accepted for oral presentation and only 24 were selected for inclusion in this book. These numbers demonstrate stringent quality criteria and the intention of maintaining a high quality forum for future editions of this conference. A number of additional keynote lectures, case studies and technical tutorials were also held. These presentations, by specialists in different knowledge areas made an important contribution to increase the overall quality of the Conference, and are partially expressed in the first two papers of the book.

The last decade has produced many textbooks on Biostatistics, with varying emphasis and degrees of mathematical complexity. This book has stood the test of time and continues to enjoy wide acceptance among students of all health and allied professions, other students and even qualified health investigators, who find it practical, simple and yet precise. This fully updated and thoroughly revised Fifth Edition, while retaining the fundamental concepts, acquaints the reader with the advances in the subject. The book explains the concepts involved in arriving at the sample size and also a quick solution to the estimation of sample size. Survival analysis and log-rank test are illustrated with examples. The essentials of Chi square tests are simplified and presented. Two-way analysis of variance (ANOVA) is explained with two examples, with and without interaction term. The chapters on Research Methods, Interventional Studies and Observational Studies provide step-by-step guide to plan and carry out quality research. Questions given in each chapter will help the learner to gauge the level of understanding of the principles and applications. Clues to the use of computer packages are provided whenever necessary. Intended for undergraduate and postgraduate medical students as well as for nursing and paramedical students, the book will also be immensely useful to medical/health faculty and researchers in the field of Biostatistics. KEY FEATURES : A new chapter on Sample Size Determination Several new sections Extensive revision of practically all chapters Provision of new examples Chapter-end exercises
