Laboratory Manual for General, Organic, and Biological Chemistry can accompany the lab portion of any one-semester GOB chemistry course. Most experiments include a link to the health sciences, such as nursing and nutrition, while concepts are framed in real-world questions and are broadly applicable. Many of the experiments illustrate concepts from more than one chapter of the text and often utilize basics from the areas of general, organic, or biological chemistry to develop concepts in one or more of the other areas. This integrated strategy helps students to understand that chemistry is not a disparate set of unrelated concepts. Using this integrated approach, students develop the skills to help them understand chemistry and to see its applications in their everyday lives.

This manual contains over 20 experiments that focus on real world applications. Each experiment is specifically referenced to Chemistry, Seventh Edition and corresponds with one or more topics covered in each chapter.

For lab courses in introductory, preparatory, and basic chemistry. Prepare introductory chemistry students for laboratory and provide a safe experience Emphasizing environmental considerations, Corwin's acclaimed Laboratory Manual for Introductory Chemistry offers a proven format of a pre-laboratory assignment, a stepwise procedure, and a post-laboratory assignment. More than 500,000 students to date in Introductory Chemistry, Preparatory Chemistry, and Allied Health Chemistry have used these experiments successfully. The 7th Edition continues to evolve with increased sensitivity to environmental and safety concerns in the laboratory. Recycle icons in the margin of each procedure alert students to recycle chemical waste and "green chemical" indicators remind students to use the appropriate waste containers provided to dispose of chemicals.
