A hero is forged in battle and a legend is born in this second installment in the Vespasian series Thracia, AD30: Even after four years of military service at the edge of the Roman world, Vespasian can't escape the tumultuous politics of an Empire on the brink of disintegration. His patrons in Rome have charged him with the clandestine extraction of an old enemy from a fortress on the banks of the Danube before it falls to the Roman legion besieging it. Vespasian's mission is the

key move in a deadly struggle for the right to rule the Roman Empire. The man he has been ordered to seize could be the witness that will destroy Sejanus, commander of the Praetorian Guard, and ruler of the Empire in all but name. Before he completes his mission, Vespasian will face ambush in snowbound mountains, pirates on the high seas, and Sejanus's spies all around him. But by far the greatest danger lies at the rotten heart of the Empire, at the nightmarish court of Tiberius, Emperor of Rome and debauched, paranoid madman.

Since its headline-making debut, the Human Development Report has become an

essential resource for development specialists, economists, and political scientists around the world. While previous Human Development Reports focused on investment in people, the 1993 Report not only updates the findings of the earlier volumes, but shifts the focus towards the "other" side of human development--mobilizing and utilizing human potential. The Report surveys the instruments for enhancing and encouraging participatory patterns of development, including privatization and participatory market structures, vertical and horizontal decentralization of government functions, devolution of government powers, enterprise decentralization, involvement of NGOs and other grass-roots organizations, and empowerment of people. It probes the vital connections between employment and development, and offers a global framework for employment that takes into account the growing pressure for international migration. In addition, it examines links between human development and international markets for goods, capital, and labor, and presents updated human development indicators for more than 160 countries.

Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format,

published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.
