After Oscar winner Meridan Mark's first attempt to direct and lead fails miserably, she concocts a duplicitous scheme to deflect a storm of bad press. Exploiting an ardent fan as a stalker, she finds herself once again in the adoring and sympathetic arms of her fans and public instead of being harangued by critics. The press grabs hold of Meridan Marks's "stalking" and projects a far more ominous picture of reality, setting in motion a maelstrom that transcends her intentions.

A sequel to Magic Under Glass finds Nimira unsuccessfully searching for missing sorcerer Ordoria Valdana and secretly reading his spell books, which warn her of grave consequences if she frees Erris' soul from its clockwork form.

Rylie Gresham has survived becoming a werewolf, going crazy from silver poisoning, and being hunted by her fiance's family. But all of that was nothing compared to the challenge Rylie faces now: being pregnant...with twins. And it definitely doesn't help that her fiance's brother has declared himself the father, either. The brothers, Seth and Abel, are at each other's throat over Rylie, even as the twins are fast approaching term. But it may be too late for all of them. The government has revealed the existence of werewolves, threatening everything that Rylie holds dear. And the evil werewolf Cain is preparing for his final act of revenge—destroying the pack and stealing Rylie's children.

This volume records the proceedings of an international conference organised as a tribute to the contribution made by Professor H. Fessler over the whole of his professional life, in the field of applied stress analysis. The conference, held at the University of Nottingham on 30 and 31 August 1990, was timed to coincide with the date of his formal retirement from the post of Professor of Experimental Stress Analysis in the University. The idea grew from discussions between some of Professor Fessler's academic associates from Nottingham and elsewhere. An organising committee was set up, and it was decided to invite contributions to the conference in the form of review papers and original research papers in the field of experimental, theoretical and computational stress analysis. The size of the response, both in papers submitted and in attendance at the conference, indicates that the idea proved attractive to many of his peers, former associates and research students. A bound copy of the volume is to be presented to Professor Fessler at the conference dinner on 30 August 1990.

This supplemental issue of Aerospace Medicine and Biology, A Continuing Bibliography with Indexes (NASA/SP-1999-7011) lists reports, articles, and other documents recently announced in the NASA STI Database. In its subject coverage, Aerospace Medicine and Biology concentrates on the biological, physiological, psychological, and environmental effects to which humans are subjected during and following simulated or actual flight in the Earth's atmosphere or in interplanetary space. References describing similar effects on biological organisms of lower order are also included. Such related topics as sanitary problems, pharmacology, toxicology, safety and survival, life support systems, exobiology, and personnel factors receive appropriate attention. Applied research receives the most emphasis, but references to fundamental studies and theoretical principles related to experimental development also qualify for inclusion. Each entry in the publication consists of a standard bibliographic citation accompanied, in most cases, by an abstract. Two indexes—subject and author—are included after the abstract section.Langley Research CenterBIBLIOGRAPHIES; AEROSPACE MEDICINE; BIOASTRONAUTICS; BIOLOGICAL EFFECTS; EXOBIOLOGY; INDEXES (DOCUMENTATION); AEROSPACE ENVIRONMENTS; LIFE SUPPORT SYSTEMS; MANNED SPACE FLIGHT; PHYSIOLOGICAL EFFECTS; PSYCHOLOGICAL EFFECTS; TOXICOLOGY...

Paperfolders can get prehistoric withthis new collection by an internationalorigami master. Ranging from the veryeasy to the low-intermediate level, 20models include a tyrannosaurus, apatosaurus,pterodactylus, dimetrodon,quetzalcoatlus, protoceratops, andother famous and lesser-known dinosaurs— all based on Montroll's singlesquare,no-cuts, no-glue approach.Dover Origina
