...

In this sample, a WSDL contract with a WS-Security policy for a JAX-WS web service provider application is created. The WS-Security policy template called UsernameToken with X509Token asymmetric message protection (mutual authentication) is used. The client signs and encrypts the SOAP body and signs and encrypts the UsernameToken in the request message.

The XwsSecurityInterceptor is an EndpointInterceptor (see Section 5.4.4, “ Intercepting requests - the EndpointInterceptor interface ”) that is based on SUN's XML and Web Services Security package (XWSS). This WS-Security implementation is part of the Java Web Services Developer Pack . Like any other endpoint interceptor, it is defined in the endpoint mapping (see Section 5.4, “ Endpoint mappings ”). This means that you can be selective about adding WS-Security support: some endpoint ...

1. Basic Concepts of Web Services Security - Securing Web ...

This book is a good introduction to the application of security to Web Services and SOA. The authors focus on "message level" security versus "transport level" security, and its application to Web Services. The book explains standards: WS-Security, WS-Policy, WS-SecurePolicy and other current standards at the time of publishing (2004).
