The research reported in *Caught in the Act* draws together the insights gained from a continuous professional development initiative for high school mathematics teachers, teaching in low socio-economic status and socially challenged environments in South Africa. The chapters show the possibilities for enhancing achievement in school mathematics if a strength-based approach is adopted to develop teaching with teachers and when their concerns are taken seriously. The book demonstrates that the ecological relevance – fitness for the context in which teachers are teaching – of the “ goods ” developed and distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education. The book is of interest to mathematics

teachers, school leaders, mathematics curriculum advisors, policy makers and researchers.

It tells the story of a rubber tappers son who has to fight the odds of his rubber estate environment where he managed to pursue the highest level of education by obtaining his PhD. It tells the journey of his odds, difficulties, joys, and pursuits. It narrates how he had overcome his pitfalls and rose to finish his education. The book narrates the relationships he had with his family members, the rubber estate environment, and the school he studied in. The end of the book gives the message to the Malaysian Indian youths that they should also persevere to continue their studies and be a success. They should not give any excuse for being school dropouts. They should be good to their family, community, and the country.

Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough . If not, then how can it be improved? The aim of this book is to provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and

researchers in the fields of educational assessment, measurement, and evaluation.

“ Twenty-twenty hindsight ” means perfect understanding of events only after they have happened. In his book, Mosiuoa Sekese looks back on his life in the old and new South Africa and gives his own perceptive interpretation of the past events. Sekese suffered discrimination and prejudice under the old apartheid government as well as the new, democratic regime. His story is highly personal, but provides the reader with unique insights into the social and educational challenges that South Africa continues to grapple with. “ I had a quick read and I find the content heartbreaking but fascinating. Especially as a white South African you are drawing me into a world that I always knew existed, but which few people have the guts and conviction to paint into words. ” – Louise Heystek-Emerton: CEO
