For the new rider, the returning rider, and the veteran who's looking for more information, this handy book has it all: the necessary facts on street-riding from first to last, clearly and concisely laid out. Author Bill Stermer brings an insider's knowledge to the job, and the result is an expert, user-friendly guide to selecting, equipping, understanding, and using a street motorcycle?with occasional useful detours into such topics as road food and tunes, security and first aid, staying warm and dry, carrying laptops or cameras, and shipping your bike. From a close survey of the types of street motorcycles and different engine configurations, Stermer goes on to discuss features and options, accessories and apparel, mechanical considerations (from power and suspension to detailing and tires), and using a motorcycle in a group or alone or with a passenger, to commute or camp, for rallies or tours.

This report describes the background of the Association of Research Libraries Microform Project and summarizes results of the survey from which the database of the project's clearinghouse on the bibliographic control of microforms has been constructed. The Microform Project was established in 1981 to assist libraries, microform publishers, and the bibliographic utilities in their efforts to achieve bibliographic access to titles in microform sets. The primary tool in providing this assistance is a Microform Cataloging Clearinghouse, the main purposes of which are to facilitate the cataloging of titles in microform sets and prevent duplication of effort. The clearinghouse database is based on the results of a survey sent to participants in the four major bibliographic utilities as well as the few major libraries that do not participate in them. The 535 useful survey returns which were received show that a large number of libraries catalog titles in microform sets and that most of them create machine-readable records for at least some of the sets they catalog. A copy of the survey questionnaire and additional information on the survey and the clearinghouse are appended. (DMC)
