For Farber, monuments serve a critical educational purpose as "touchstones" that connect citizens to their past, but also as propaganda for systems that have the means to uphold them. "Now, it's worth questioning what the relationship will be between these toppled monuments and changing systems of injustice," he says. "That's yet to be written."

The Neolithic period, when agriculture began and many monuments - including Stonehenge - were constructed, is an era fraught with paradoxes and ambiguities. Starting in the Mesolithic and carrying his analysis through to the Late Bronze Age, Richard Bradley sheds light on this complex period and the changing consciousness of these prehistoric peoples. *The Significance of Monuments* studies the importance of monuments tracing their history from their first creation over six thousand years later. Part One discusses how monuments first developed and their role in developing a new sense of time and space among the inhabitants of prehistoric Europe. Other features of the prehistoric landscape - such as mounds and enclosures - across Continental Europe are also examined. Part Two studies how such monuments were modified and reinterpreted to suit the changing needs of society through a series of detailed case studies. *The Significance of Monuments* is an indispensable text for all students of European prehistory. It is also an enlightening read for professional archaeologists and all those interested in this fascinating period.

"Owen Dwyer and Derek Alderman examine civil rights memorials as cultural landscapes, offering the first book-length critical reading of the monuments, museums, parks, streets, and sites dedicated to the African-American struggle for civil rights and interpreting them in the context of the Movement's broader history and its current scene. In paying close attention to which stories, people, and places are remembered and which are forgotten, the authors present an engaging account of an unforgettable story."--BOOK JACKET.

This volume analyses the interpretation of the built environment by connecting analytical frames developed in the fields of semiotics and geography. It focuses on specific components of the built environment: monuments and memorials, as it is easily recognisable that they are erected to promote specific meanings in the public space. The volume concentrates on monuments and memorials in post-Soviet countries in Eastern Europe, with a focus on Estonia. Elites in post-Soviet countries have often used monuments to shape meanings reflecting the needs of post-Soviet culture and society. However, individuals can interpret monuments in ways that are different from those envisioned by their designers. In Estonia, the relocation and removal of Soviet monuments and the erection of new ones has often created political divisions and resulted in civil disorder. This book examines the potential gap between the designers' expectations and the users' interpretations of monuments and memorials. The main argument is that connecting semiotics and geography can provide an innovative framework to understand how monuments convey meanings and how these are variously interpreted at societal levels.

Why do certain works of art make it into the canon while others just enjoy a brief moment of recognition, if at all? How do moments produce monuments, and why are monuments erased from our

cultural memory in only a moment? - Taking into account these cultural processes of creating, storing, remembering and forgetting that are omnipresent and have an immense influence on how we perceive artefacts and cultural events, the articles in this collection analyze the phenomenon of cultural production, transmission and reception from various angles, drawing on approaches from both literary and cultural studies. With its transdisciplinary approach, this book uniquely responds to an everyday cultural phenomenon that so far has not received such wide-ranging attention.

A look at the phenomenon of sacred geometry focuses on the monuments discovered in 1976 on Mars by NASA's Viking spacecraft, speculating on their meaning in terms of extraterrestrial life, aliens on Earth, and meditational rebirthing. Original.

Kirk Savage explores the National Mall in Washington D.C., site of some of the most important & poignant memorials in the U.S. He shows how the idea of monument has changed over the decades, & how the 19th century concept of the monument has given way to the late 20th century idea of 'space', the monument as an experience.

Atlantic Europe is the zone par excellence of megalithic monuments, which encompass a wide range of earthen and stone constructions from impressive stone circles to modest chambered tombs. A single basic concept lies behind this volume - that the intrinsic qualities encountered within the diverse landscapes of Atlantic Europe both informed the settings chosen for the monuments and played a role in determining their form and visual appearance. *Monuments and Landscape in Atlantic Europe* goes significantly beyond the limits of existing debate by inviting archaeologists from different countries with the Atlantic zone (including Britain, France, Ireland, Spain and Sweden) to examine the relationship between landscape features and prehistoric monuments in their specialist regions. By placing the issue within a

This collection of newly published essays examines our relationship to physical objects that invoke, commemorate, and honor the past. The recent destruction of cultural heritage in war and controversies over Civil War monuments in the US have foregrounded the importance of artifacts that embody history. The book invites us to ask: How do memorials convey their meanings? What is our responsibility for the preservation or reconstruction of historically significant structures? How should we respond when the public display of a monument divides a community? This anthology includes coverage of the destruction of Palmyra and the Bamiyan Buddhas, the loss of cultural heritage through war and natural disasters, the explosive controversies surrounding Confederate-era monuments, and the decay of industry in the U.S. Rust Belt. The authors consider issues of preservation and reconstruction, the nature of ruins, the aesthetic and ethical values of memorials, and the relationship of cultural memory to material artifacts that remain from the past. Written by a leading group of philosophers, art historians, and archeologists, the 23 chapters cover monuments and memorials from Dubai to Detroit, from the instant destruction of Hiroshima to the gradual sinking of Venice.

The New Orleans mayor who removed the Confederate statues confronts the racism that shapes us and argues for white America to reckon with its past. A passionate, personal, urgent book from the man who sparked a national debate. "There is a difference between remembrance of history and reverence for it." When Mitch Landrieu addressed the people of New Orleans in May 2017 about his decision to take down four Confederate monuments, including the statue of Robert E. Lee, he struck a nerve nationally, and his speech has now been heard or seen by millions across the country. In his

first book, Mayor Landrieu discusses his personal journey on race as well as the path he took to making the decision to remove the monuments, tackles the broader history of slavery, race and institutional inequities that still bedevil America, and traces his personal relationship to this history. His father, as state legislator and mayor, was a huge force in the integration of New Orleans in the 1960s and 1970s. Landrieu grew up with a progressive education in one of the nation's most racially divided cities, but even he had to relearn Southern history as it really happened. Equal parts unblinking memoir, history, and prescription for finally confronting America's most painful legacy, *In the Shadow of Statues* contributes strongly to the national conversation about race in the age of Donald Trump, at a time when racism is resurgent with seemingly tacit approval from the highest levels of government and when too many Americans have a misplaced nostalgia for a time and place that never existed.
