I had to get EZ-Anatomy and Physiology  
to support my need for a high level view,  
and now I only use the Tortora book for  
the excellent illustrations and the boxed  
lists of things to remember. I won't read it  
any longer. It just confused the hell out of  
me and makes me feel like I'm drowning.

A favorite for first year acupuncture and TCM students because it covers the essential knowledge of the channels and collaterals and the characteristics of the channel system, providing descriptives that include the key points, pathway, associated organs and points, physiology, pathology, clinical applications, and divergent, teninomuscular, and collateral channels.
