Installing WebLogic Server Using Graphical-Mode Installation

If you are adding components to an existing installation of WebLogic Platform, you should shut down any running servers before starting the installation. All WebLogic Platform components installed in a BEA product directory (for example, /bea/weblogic81) must be at the same version level. If you attempt to install additional components at a higher version than those that are already installed in that directory, the installation program prompts you to upgrade your existing components before ...
